

“ I couldn't believe how easy it was to walk because I'd forgotten what it was like to walk without thinking”

“ There is no doubt that had I not had the FES device, I would not be as advanced in my recovery today”

8TH APRIL 2019

OPEN DAY: CAN I WALK AGAIN?

Functional Electrical Stimulation.

Functional Electrical Stimulation is a medical application. It can strengthen or support functional activities such as walking, reaching and grasping object, and other movement patterns that may have been damaged following a neurological disorder or disease process.

Application via tina.rawlings@odstockmedical.com

or call 01722 439575
